EDUCATION

Stony Brook University

Master of Science in Health Informatics, specialization in Data Analytics

August 2024

Coursework: Big Data Technologies, Cloud Computing, DataSci Python and R, Tableau

GPA: 3.96

Stony Brook University

Bachelor of Science in Health Science, concentration in Health Care Informatics

May 2023

GPA: 3.47

WORK EXPERIENCE

Clinical Practice Management Plan (CPMP)

Stony Brook Medicine

Data Analyst I

Oct 2024 – Present

- Conducted independent validation of a large-scale data migration (ETL) involving ~90,000 records by writing SQL scripts with inner and outer joins to reconcile datasets and identify mapping discrepancies; used Excel (VLOOKUPs, pivot tables) for data verification and built a PowerPoint presentation summarizing findings for executive review.
- Execute and maintain daily SQL scripts for data extraction and validation, modifying existing queries for evolving reporting requirements and scripting new ones to automate recurring analyses.
- (In Progress) Leading integration of Press Ganey survey data into the MicroStrategy environment by collaborating with Patient Experience and vendor teams to align data mappings, build SQL validation queries, and assess Tableau dashboards to identify critical metrics, ensure data accuracy, and optimize transformation logic for consistent reporting.
- Validated month-end executive dashboards built in Excel by reconciling data from multiple clinical, operational, and financial sources, verifying formula accuracy, and ensuring reporting consistency
- Optimized enterprise dashboard integrity within PDS DASH, a template-driven Excel reporting system, by auditing 197 reports feeding into 4 dashboards to identify broken file links, outdated connections, and cross-report dependencies; documented results to improve accuracy and maintainability.
- Delivered 150+ ad hoc analyses and custom reports using MicroStrategy, SQL, and Excel, translating complex data requests into actionable insights for executive and operational stakeholders.
- (In Progress) Designing a metadata tracking database in Microsoft Access and SQL to catalog report-to-dashboard dependencies, attribute usage, and filter logic across 800+ reports, enhancing visibility and simplifying impact analysis for BI updates.
- Streamlined and updated internal documentation and reporting procedures, improving clarity and efficiency across recurring deliverables.
- Utilized SQL, Excel, Cerner, and BI tools to support clinical quality analysis, provider performance tracking, and operational decision-making.

INTERNSHIPS

Clinical Practice Management Plan (CPMP)

Stony Brook Medicine

Decision Support Intern

May – Aug. 2023

- Reporting Portal Usage Project
 - Designed Microstrategy dashboards for the PDS Portal Web Program to enhance reporting.
- Maintained and updated critical databases to ensure data accuracy and integrity.
- Developed visual dashboards using Excel and MicroStrategy BI tools for data-driven insights.

Long Island Network for Clinical and Translational Science (LINCATS)

Stony Brook Medicine

Senior Research Support Intern

Jan. 2022 - May 2023

- Performing data gathering, coordination and cleaning tasks in Excel, OnCore, TriNetX and PowerChart
- Assisting the program in medical data quality assurance and clinical research subject tracking

SKILLS

Programming & Data Analytics: SQL, Python, R, HTML, Microsoft Excel, SSMS

BI & Data Tools: MicroStrategy, Tableau, Power Query, Microsoft Access, Smartsheet, GitHub, PowerPoint, Google Suite

Clinical & Research Systems: Cerner PowerChart, OnCore, TriNetX, Athena IDX

Certifications: Astronomer Apache Airflow Certification, HIPAA Training – Stony Brook University
