CAREER OBJECTIVE

Eager and motivated data analyst with a background in health informatics, seeking growth in a data-focused role. Passionate about learning new technologies, enhancing analytics skills, and gaining hands-on experience with end-to-end ETL processes.

EDUCATION

Arizona State University - Non-Degree Coursework	May 2025
Coursework in Progress: Principles of Programming	
Stony Brook University	
Master of Science in Health Informatics, specialization in Data Analytics	August 2024
Coursework: Big Data Technologies, Cloud Computing, DataSci Python and R	GPA: 3.96
Stony Brook University	May 2023
Bachelor of Science in Health Science, concentration in Health Care Informatics	GPA: 3.47

WORK EXPERIENCE

Clinical Practice Management Plan (CPMP)	Stony Brook Medicine
Data Analyst I	Oct 2024 – Present
- Led review and optimization of existing dashboard file dependencies, reducing unnecessary connections and integrating updated data sources. - Conducted impact analysis of pilot AI dictation tools on provider KPIs across specialties, supporting vendor selection through data-driven insights. - Validated data for accuracy and consistency, collaborated with reporting supervisors to refine recurring daily, monthly and quarterly reports. - Utilized Excel, SQL, Cerner, and Business Intelligence tools to support ad hoc reporting, clinical quality analysis, and physician access optimization. - Fulfilled ad-hoc data requests and generated custom reports.	

INTERNSHIPS

Clinical Practice Management Plan (CPMP)	Stony Brook Medicine
Decision Support Intern	May – Aug. 2023
- Reporting Portal Usage Project - Designed dashboards for the PDS Portal Web Program to enhance reporting. - Developed communication and training plans to promote user adoption. - Maintained and updated critical databases to ensure data accuracy and integrity. - Developed visual dashboards using Excel and MicroStrategy BI tools for data-driven insights.	
Long Island Network for Clinical and Translational Science (LINCATS)	Stony Brook Medicine
Senior Research Support Intern	Jan. 2022 - May 2023
- Performing data gathering, coordination and cleaning tasks in OnCore, TriNetX and PowerChart - Assisting the program in medical data quality assurance and clinical research subject tracking - Administrative lead of the community engagement module - Participated in strategy and program development sessions with Module lead, COO and Associate Director of Technology and Resources	

SKILLS

Programming: Python, SQL, R, HTML

Technologies: MicroStrategy (BI tool), GitHub, Smartsheet, Tableau, JIRA

Certifications: Astronomer Apache Airflow Certification, HIPAA Training – Stony Brook University

Computer: Proficient in Microsoft Excel, Word, PowerPoint, Google Suite, PowerChart, OnCore (clinical trial management system), TriNetX (research data platform)
